NOTE: For national statistics detailing the amount of federal government receipts and expenditures, BEA publishes the total level at an annualized rate. BEA does this so that monthly estimates can be easily compared to quarterly estimates included in BEA's quarterly gross domestic product report, for example. To be consistent, the figures in this table also are annualized. For more information, see the FAQ ["Why does BEA publish estimates at annual rates?"](#) on BEA's website.

Data on this table will be superseded by updated estimates.
