## U.S. International Transactions: Second Quarter 2016

### Current Account Balance

The **U.S. current-account deficit** decreased to \$119.9 billion (preliminary) in the second quarter of 2016 from \$131.8 billion (revised) in the first quarter of 2016, according to statistics released by the Bureau of Economic Analysis (BEA). The deficit decreased to 2.6 percent of current-dollar gross domestic product (GDP) from 2.9 percent in the first quarter.

The \$12.0 billion decrease in the deficit reflected an \$8.9 billion increase in the surplus on primary income to \$42.9 billion, a \$3.1 billion decrease in the deficit on secondary income to \$37.6 billion, and a \$0.4 billion increase in the surplus on services to \$61.5 billion. These changes were partly offset by a \$0.5 billion increase in the deficit on goods to \$186.7 billion.

## Current Account Transactions (tables 1-5)

### Exports of goods and services and income receipts

Exports of goods and services and income receipts increased \$18.0 billion in the second quarter to \$777.0 billion.

- Primary income receipts increased \$10.4 billion to \$198.9 billion, primarily reflecting an increase in *direct investment income*.
- Goods exports increased \$6.1 billion to \$360.2 billion, reflecting increases in *industrial supplies and materials*, primarily in *petroleum and products*, and *foods, feeds, and beverages*. A decrease in *consumer goods except food and automotive* partly offset these increases.

### Imports of goods and services and income payments

Imports of goods and services and income payments increased \$6.1 billion to \$896.9 billion.

- Goods imports increased \$6.5 billion to \$546.9 billion, reflecting increases in imports of *industrial supplies and materials*, largely in *energy products*, and *capital goods except automotive*. These increases were partly offset by a decrease in imports of *consumer goods, except food and automotive*, particularly *other household goods, including cell phones*.
- Primary income payments increased \$1.4 billion to \$155.9 billion, reflecting an increase in *direct investment income*.

- Secondary income payments decreased \$2.4 billion to \$69.8 billion, reflecting a decrease in *U.S. government transfers*, both in *U.S. government grants* and in *U.S. government pensions and other transfers*.

### Financial Account (tables 1, 6, 7, and 8)

Net U.S. borrowing measured by financial-account transactions was \$31.1 billion in the second quarter, a \$14.3 billion decrease from net borrowing of \$45.4 billion in the first quarter. An increase in net U.S. acquisition of *financial assets excluding financial derivatives* was mostly offset by an increase in net U.S. incurrence of *liabilities excluding financial derivatives*. Net transactions in *financial derivatives other than reserves* reflected more net lending in the second quarter than in the first quarter.

#### Financial assets

Net U.S. acquisition of *financial assets excluding financial derivatives* increased \$233.8 billion to \$293.7 billion.

- Transactions in *portfolio investment assets* increased \$167.3 billion to net U.S. acquisition of \$109.9 billion, as a shift to net acquisition of *equity and investment fund shares* more than offset a shift to net sales of *debt securities*.
- Net U.S. acquisition of *direct investment assets* increased \$38.7 billion to \$106.1 billion, largely reflecting an increase in net acquisition of *equity*.
- Net U.S. acquisition of *other investment assets* increased \$26.5 billion to \$77.5 billion, as a shift to net provision of *loans* to foreigners exceeded a shift to net withdrawal of U.S. residents' *deposits* abroad (in *currency and deposits*).

#### Liabilities

Net U.S. incurrence of *liabilities excluding financial derivatives* increased \$232.2 billion to \$350.4 billion.

- Net U.S. incurrence of *other investment liabilities* increased \$143.9 billion to \$192.0 billion, mostly reflecting a shift to net incurrence of *deposit* liabilities in *currency and deposits*.
- Net U.S. incurrence of *direct investment liabilities* increased \$68.3 billion to \$159.6 billion, reflecting increases in net incurrence of both *equity* and *debt instrument* liabilities.

#### Financial derivatives

Transactions in *financial derivatives other than reserves* reflected second-quarter net lending of \$25.6 billion, a \$12.6 billion increase from the first quarter.

### Statistical Discrepancy (table 1)

The statistical discrepancy increased \$2.3 billion in the second quarter to \$88.8 billion.

#### Revisions

##### Revisions to First-Quarter 2016 International Transactions Accounts Aggregates

Billions of dollars, seasonally adjusted

	<u>Preliminary estimate</u>	<u>Revised estimate</u>
Current-account balance	-124.7	-131.8
Goods balance	-186.4	-186.3
Services balance	64.6	61.1
Primary-income balance	37.5	34.0
Secondary-income balance	-40.3	-40.6
Net lending from financial-account transactions	-35.0	-45.4
Statistical discrepancy	89.6	86.5

Next release: December 15, 2016 at 8:30 A.M. EST  
 U.S. International Transactions, Third Quarter 2016

#### Updated Statistics on U.S. International Services and New Geographic Detail

BEA will release its most detailed annual statistics on trade in services in October. This year's release will include expanded geographic detail and statistics on information and communications technology (ICT) and potentially ICT-enabled services. For more information, see Updated Statistics on U.S. International Services and New Geographic Detail ([www.bea.gov/international/international\\_services\\_statistics\\_2016.htm](http://www.bea.gov/international/international_services_statistics_2016.htm)).

## Additional Information

### Resources

- Stay informed about BEA developments by reading the BEA [blog](#), signing up for BEA's [email subscription service](#), or following BEA on Twitter [@BEA\\_News](#).
- Historical time series for these estimates can be accessed in BEA's [Interactive Data Application](#).
- Access BEA data by registering for BEA's Data [Application Programming Interface](#) (API).
- For more on BEA's statistics, see our monthly online journal, the [Survey of Current Business](#).
- BEA's [news release schedule](#).
- More information on these International Transactions statistics will be provided next month in the [Survey of Current Business](#).
- More information on the International Transactions Accounts and a description of the estimation methods used to compile them is provided in [U.S. International Economic Accounts: Concepts and Methods](#).

### Definitions

The **current account** consists of transactions between U.S. residents and nonresidents in goods, services, primary income, and secondary income.

**Goods** are physical items with ownership rights that can be exchanged among institutional units through transactions.

**Services** transactions consist of transactions arising from productive activities that change the condition of the consumer or that facilitate the exchange of products and financial assets.

**Primary income** transactions include investment income and compensation of employees. Investment income is the return on holdings of financial assets and includes direct investment income, portfolio investment income, other investment income, and income on reserve assets. Compensation of employees is income for the contribution of labor inputs to the production process.

**Secondary income** consists of current transfers between residents and nonresidents. Unlike an exchange, a transfer is a transaction in which a good, service, or asset is provided without a corresponding return of economic value. Secondary income receipts and payments include U.S. government and private transfers, such as U.S. government grants and pensions, fines and penalties, withholding taxes, personal transfers (remittances), insurance-related transfers, and other current transfers.

The **capital account** consists of capital transfers between residents and nonresidents and the cross-border acquisition and disposal of nonproduced non-financial assets. Capital transfers include debt forgiveness and certain disaster-related nonlife insurance claims. Nonproduced nonfinancial assets include natural resources and contracts, leases, and licenses. Capital account transactions are distinguished from current account transactions in that capital account transactions result in a change in the assets of one or both parties to the transaction without affecting the income or savings of either party.

The **financial account** consists of transactions between U.S. residents and nonresidents for direct investment, portfolio investment, other investment, reserves, and financial derivatives other than reserves.

**Direct investment** is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise resident in another economy. Ownership or control of 10 percent or more of the nonresident entity's voting securities is the threshold for separating direct investment from other types of investment. Direct investment transactions include transactions in equity (including reinvestment of earnings) and debt instruments.

**Portfolio investment** transactions consist of cross-border transactions involving equity and investment fund shares and debt securities, excluding those included in direct investment or reserve assets.

**Other investment** is a residual category that includes cross-border financial instruments other than those included in direct investment, portfolio investment, financial derivatives, and reserve assets. Other investment transactions consist of transactions in currency and deposits, loans, insurance technical reserves, trade credit and advances, and, for liabilities, special drawing rights allocations.

**Reserve assets** are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes such as maintaining confidence in the currency and the economy and serving as a basis for foreign borrowing. The major published components are monetary gold, International Monetary Fund (IMF) special drawing rights (SDRs), reserve position in the IMF, and other reserve assets.

**Financial derivatives other than reserves** consist of financial contracts that are linked to underlying financial instruments, commodities, or indicators. Transactions in financial derivatives consist of U.S. cash receipts and payments arising from the sale, purchase, periodic settlement, or final settlement of financial derivatives contracts. Transactions in financial derivatives are only available as a net value equal to transactions for assets less transactions for liabilities. A positive value represents net cash payments by U.S. residents to foreign residents from settlements of derivatives contracts (net lending) and a negative value represents net U.S. cash receipts (net borrowing).

The **statistical discrepancy** is the difference between net acquisition of assets and net incurrence of liabilities in the financial account (including financial derivatives) less the difference between total credits and total debits recorded in the current and capital accounts. The statistical discrepancy can also be calculated as the difference between net lending (borrowing) measured from financial-account transactions and net lending (borrowing) measured from current- and capital-account transactions.

The **current-account balance** is the difference between credits (exports and income receipts) and debits (imports and income payments) in the current account. The balance is a net measure of current-account transactions between the United States and the rest of the world. A positive balance indicates a current-account **surplus**. A negative balance indicates a current-account **deficit**.

**Net lending (borrowing)** measures the balance of funds supplied to the rest of the world. Net lending means that, in net terms, the U.S. economy supplies funds to the rest of the world. Net borrowing means the opposite. Net lending (borrowing) can be measured by current- and capital account transactions or by financial-account transactions. Conceptually, the two measures are equal. In practice, the two measures differ by the statistical discrepancy.

## Release and revision cycle

Preliminary quarterly International Transactions Accounts (ITA) statistics are released in March, June, September, and December approximately 75 days after the end of the reference quarter. These statistics are revised the following quarter to incorporate new source data. Quarterly statistics are open for revision for at least the prior three years in annual revisions released in June. Preliminary annual statistics are released in March along with statistics for the fourth quarter of the previous year. These annual statistics are open for revision for at least the three prior years in subsequent annual revisions.

## Related statistics

The ITAs comprise one part of a broader set of U.S. international economic accounts that, taken together, provide a comprehensive, integrated, and detailed picture of U.S. international economic activities.

The [International Investment Position \(IIP\) Accounts](#) are released quarterly. Financial transactions that are reported in the ITAs are one type of change in position recorded in the IIP Accounts.

Statistics on [direct investment and multinational enterprises](#) (MNEs) include annual statistics on the activities of MNEs, detailed annual and quarterly statistics on direct investment, and annual statistics on new investment in the United States.

Statistics on [International Services](#) that include detailed annual information on trade in services and on services supplied through the channel of direct investment by affiliates of MNEs are released annually.

[U.S. International Trade in Goods and Services](#), released by BEA and the U.S. Census Bureau, provides monthly statistics on trade in goods and services.

p Preliminary r Revised n.a. Not available (\*) Transactions are between zero and +/- \$500,000

1. All travel purposes include 1) business travel, including expenditures by border, seasonal, and other short-term workers and 2) personal travel, including health-related and education-related travel.

2. Secondary income (current transfer) receipts and payments include U.S. government and private transfers, such as U.S. government grants and pensions, fines and penalties, withholding taxes, personal transfers (remittances), insurance-related transfers, and other current transfers.

3. Transactions for financial derivatives are only available as a net value equal to transactions for assets less transactions for liabilities. A positive value represents net U.S. cash payments arising from derivatives contracts, and a negative value represents net U.S. cash receipts.

4. The statistical discrepancy, which can be calculated as line 109 less line 108, is the difference between total debits and total credits recorded in the current, capital, and financial accounts. In the current and capital accounts, credits and debits are labeled in the table. In the financial account, an acquisition of an asset or a repayment of a liability is a debit, and an incurrence of a liability or a disposal of an asset is a credit.

5. Current- and capital-account statistics in the international transactions accounts differ slightly from statistics in the National Income and Product Accounts (NIPAs) because of adjustments made to convert the international transactions statistics to national economic accounting concepts. A reconciliation between annual statistics in the two sets of accounts appears in NIPA [table 4.3B](#).

6. Net lending means that U.S. residents are net suppliers of funds to foreign residents, and net borrowing means the opposite. Net lending or net borrowing can be computed from current- and capital-account transactions or from financial-account transactions. The two amounts differ by the statistical discrepancy.

Notes: Details may not add to totals because of rounding. See International Transactions Accounts table 1.3 at [www.bea.gov/itable/](http://www.bea.gov/itable/) for geographic detail.

p Preliminary r Revised

1. Primarily withholding taxes received and fines levied by U.S. government agencies.

2. Primarily insurance-related transfers; pensions and benefits received from Canada, Germany, and the United Kingdom; antitrust-related class-action lawsuits; and personal transfers received by U.S. residents.

3. Nonmilitary and military assistance provided to foreigners in the form of goods, services, or cash under programs enacted by the U.S. Congress.

4. Primarily U.S. government social security and retirement benefits paid to former U.S. residents who reside abroad and contributions to international organizations and commissions to meet the financial obligations of membership and to fund United Nations peacekeeping operations.

5. Personal transfers (sometimes called remittances) from U.S. resident immigrants to foreign residents.

6. Primarily insurance-related transfers; withholding taxes paid by U.S. companies; and charitable donations by U.S. entities.

Note: Details may not add to totals because of rounding.

p Preliminary r Revised (D) Suppressed to avoid disclosure of individual companies.

1. Financial transactions on an asset/liability basis are organized according to whether the transactions relate to an asset or a liability. Net U.S. acquisition of direct investment assets relates to U.S. parent and U.S. affiliate acquisition of claims (assets). Net U.S. incurrence of direct investment liabilities relates to U.S. affiliate and U.S. parent incurrence of liabilities.

2. Financial transactions on a directional basis are organized according to whether the transactions relate to outward investment (U.S. direct investment abroad) or inward investment (foreign direct investment in the United States). Transactions for outward investment relate to transactions for U.S. parent claims and liabilities. Transactions for inward investment relate to transactions for U.S. affiliate liabilities and claims.

Note: Details may not add to totals because of rounding.
