GUIDE TO INDUSTRY CLASSIFICATIONS FOR INTERNATIONAL SURVEYS 2017

Industry classifications adapted from the
2017 North American Industry Classification System
(NAICS)

INDUSTRY CLASSIFICATIONS

The international surveys industry (ISI) classifications described here are to be used when completing the industry classifications items in BEA’s surveys of direct investment and services. The classifications and their code numbers were adapted by BEA from the [2017 North American Industry Classification System](#) (hereafter referred to as the “2017 NAICS”). Industry classifications in the previous version of this guide were adapted from the 2012 North American Industry Classification System.

Reflecting the changes made to the NAICS for 2017, the new 2017 ISI classifications differ minimally from the 2012 ISI classifications. The table below summarizes the few reclassifications of activities and other changes in the 2017 guide:

Nature of change	From: 2012 International Survey Industry		To: 2017 International Surveys Industry	
	Name	Code	Name	Code
Reclassification of wired telecommunications	Wired telecommunications carriers	5171	Wired and wireless telecommunications carriers	5173
Reclassification of wireless telecommunications	Wireless telecommunications carriers (except satellite)	5172	Wired and wireless telecommunications carriers	5173
Name change only	Bakeries and tortillas	3118	Bakery products and tortillas	3118
Name change only	Iron and steel mills and ferroalloys	3311	Iron and steel mills	3311
Name change only	Machine shops; turned products; and screws, nuts, and bolts	3327	Machine shop products, turned products, and screws, nuts, and bolts	3327
Name change only	Non-depository credit intermediation	5224	Non-depository credit intermediation, except branches and agencies	5224
Name change only	Insurance carriers, except life insurance carriers	5243	Insurance carriers, except direct life insurance carriers	5243
Name change only	Life insurance carriers	5249	Direct life insurance carriers	5249

For additional information, refer to the detailed description of the ISI codes that follow in this guide and in the 2017 NAICS manual.

For reporting on BEA surveys, 200 individual ISI classifications were adapted from the 2017 NAICS, and each has been assigned a four-digit numerical code. (The previously used 2012 ISI classifications had 201 four-digit codes.) The titles of some ISI classifications, by themselves, may not be sufficiently descriptive to classify certain activities. More information on the content of each classification is provided in the detailed definitions that follow. For some classifications, a “NOTE” given after the definition lists closely related activities and ISI codes NOT included in the classification being defined.

For the convenience of those reporters familiar with the 2017 NAICS, the 2017 NAICS code or codes that correspond to a given ISI classification are shown in parentheses under the heading of each ISI classification. Because differences between a given ISI classification and the corresponding 2017 NAICS classification(s) may exist, the detailed definitions of the ISI classifications should be consulted when completing industry classification items in BEA surveys.

AGRICULTURE, FORESTRY, FISHING, AND HUNTING

The agriculture, forestry, fishing, and hunting sector (ISI codes 1110–1150) comprises businesses that are engaged in growing crops, raising animals, harvesting timber, and harvesting fish and other animals from a farm, ranch, or their natural habitats. The sector distinguishes two basic activities: agricultural production and agricultural support activities. Agricultural production includes businesses performing the complete farm or ranch operation, such as farm owner-operators, tenant farm operators, and sharecroppers. Agricultural support activities include businesses that perform one or more activities associated with farm operation, such as soil preparation, planting, harvesting, and management, on a contract or fee basis.

1110 Crop production

(2017 NAICS code 111)

Businesses engaged in growing crops for food and fiber.

Examples of such crops include:

- Corn
- Cotton
- Dry peas and beans
- Fruits and tree nuts
- Maple sap
- Mushrooms
- Potatoes
- Soybeans and other oilseeds
- Sugarcane and sugarbeets
- Tobacco
- Vegetables and melons
- Wheat

Also included are nursery and tree production (trees with growth cycles of 10 years or less) and floriculture production.

NOTE – Managing farms without owning and/or operating the farms is classified in ISI cod 1150.

1120 Animal production and aquaculture

(2017 NAICS code 112)

Businesses that raise or fatten animals for the sale of animals or animal products and/or raise aquatic plants and animals in controlled or selected aquatic environments for the sale of aquatic plants, animals, or their products.

Examples of businesses in, or products of, this industry include:

- Beef cattle ranches, farms, and feedlots
- Dairy cattle and milk production
- Farm-raised fish
- Fur-bearing animals
- Hog and pig farms
- Horses
- Poultry and egg products

NOTE – The catching or taking of fish from their natural habitat is classified in ISI code 1140.

1130 Forestry and logging
(2017 NAICS code 113)

Businesses in this industry grow and harvest timber on a long production cycle of 10 years or more. They engage in the operation of timber tracks for the purpose of selling standing timber. These businesses also grow trees for reforestation or gather forest products such as barks, fibers, ginseng, gums, and truffles.

NOTE – Growing short-rotation woody trees with a growth cycle of less than 10 years is classified in ISI code 1110.

Gathering maple sap is classified in ISI code 1110.

Acting as lessors of land with trees as real estate property is classified in ISI code 5310.

1140 Fishing, hunting, and trapping
(2017 NAICS code 114)

Businesses engaged in:

- Commercial catching or taking of finfish, shellfish, or miscellaneous marine products from a natural habitat
- Commercial hunting or trapping
- Operating game or hunting preserves

NOTE – The farm-raising of finfish and shellfish are classified in ISI code 1120.

The commercial catching or taking and processing of fresh fish such as canning and freezing on the fishing vessel are classified in ISI code 3117.

Operating nature preserves is classified in ISI code 7121.

1150 Support activities for agriculture and forestry
(2017 NAICS code 115)

Businesses that provide support services to agricultural and forestry production.

Examples of activities of this industry include:

- Animal breeding services
- Crop production and harvesting services
- Farm labor and management services
- Forestry consulting
- Postharvest crop activities
- Soil preparation services

NOTE – Stemming and re-drying tobacco are classified in ISI code 3122.

Landscaping services are classified in ISI code 5617.

MINING, QUARRYING, AND OIL AND GAS EXTRACTION

The mining, quarrying, and oil and gas extraction sector (ISI codes 2111–2133) comprises businesses that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, crushing, washing, and other operations performed at the mine site. This sector consists of two basic activities: (1) mine operation and (2) mining support activities. Mine operations are classified according to the natural resource mined.

Businesses engaged in mining operations but whose primary outputs are finished manufactured products are classified in manufacturing. For example, a business operating a granite quarry, producing dimension stone, and further shaping the dimension stone into building stone would be classified in manufacturing. Conversely, a mine that manufactures a small amount of finished products would be classified in mining.

2111 Oil and gas extraction (2017 NAICS code 211)

Businesses engaged in operating oil and gas field properties, including all activities in the preparation of oil and gas up to the point of shipment from the producing property. This includes businesses that have complete responsibility for operating oil and gas wells for others on a contract or fee basis.

Examples of activities in the industry include:

- Drilling, completing, and equipping wells
- Exploring for crude petroleum and natural gas
- Mining and extraction of oil from oil shale and oil sands
- Operating separators, emulsion breakers, and desilting equipment
- Producing natural gas and recovering hydrocarbon liquids of oil from oil and gas field gases

NOTE – Crude petroleum extraction combined with refining is classified in ISI code 3242.

Businesses primarily engaged in providing support services required for the drilling or operation of oil and gas wells are classified in ISI code 2132.

2121 Coal (2017 NAICS code 2121)

Businesses engaged in developing mine sites or in mining and preparing (crushing, screening, washing, sizing, etc.) the following minerals:

- Anthracite

MANUFACTURING

The manufacturing sector (ISI codes 3111–3399) comprises businesses engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is classified in construction (i.e., structures).

Manufacturing businesses acquire materials that are products of agriculture, forestry, fishing, mining, and quarrying as well as products of other manufacturing businesses. A business may process the materials itself or may contract with another manufacturer to perform the processing on materials which they provide to the other manufacturer. Both types of businesses are included in manufacturing.

The product produced by a manufacturer may be finished for final consumption or it may be a material input for an entity engaged in further manufacturing. For example, the product of an alumina refinery is the input used in the primary production of aluminum; primary aluminum is the input to an aluminum wire drawing plant; and aluminum wire is the input for a fabricated wire product manufacturer.

Within the manufacturing sector, the individual industries generally reflect distinct production processes related to material inputs, production equipment, and employee skills. In the machinery area, where assembling is a key activity, parts and accessories for manufactured products are classified in the industry of the finished manufactured item when they are made for sale separately. For example, a replacement refrigerator door would be classified with refrigerators and an attachment for a piece of metal working machinery would be classified with metal working machinery. However, components and inputs from other manufacturers are classified based on the production function of the component manufacturer.

Some borderline activities that are classified in manufacturing include:

- Apparel jobbing (assigning materials to contract factories or shops for fabrication or other contract operations) as well as contracting on materials owned by others
- Electroplating, plating, metal heat treating, and polishing for the trade
- Fabricating signs and advertising displays

WHOLESALE TRADE

The wholesale trade sector (ISI codes 4231–4251) comprises businesses engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The wholesaling process is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of (1) goods for resale (goods sold to other wholesalers or retailers), (2) capital or durable nonconsumer goods, and (3) raw and intermediate materials and supplies used in production.

Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office. These warehouses and offices are characterized by having little or no display of merchandise. In addition, neither the design nor the location of the premises is intended to solicit walk-in traffic. Wholesalers do not normally use advertising directed to the general public. Customers are generally reached initially via telephone, in-person marketing, or by specialized advertising that may include Internet and other electronic means.

In general, wholesaling denotes sales in large volumes, though durable nonconsumer goods may be sold in single units. Sales of capital or durable nonconsumer goods used in the production of goods and services, such as farm machinery, medium- and heavy-duty trucks, and industrial machinery are included in wholesale trade.

The sector comprises two main types of wholesalers: (1) merchant wholesalers that sell goods on their own account and (2) business-to-business electronic markets, agents, and brokers that arrange sales and purchases for others, generally for a commission or fee.
